RELEVANT PROJECTS/ COURSES

Monsters
- Collaborated with a team to develop a system to move around different screens of an application.
- I coded the writing and reading to file functions, which saved the state of the project, and also pulled data each time the program started.

Address Book
- Created a database program where you can view, add, update, delete, search, and print records from an address book. I used C# and the .net framework to create this desktop app.

Cuckoo
- Designed, developed, and published a casual mobile game using C# and Unity on Google Play.
- The game has a beautiful design and a pleasant soundtrack. The purpose of the game is to score as many points as possible.
